Academic support requests

Student Support | ASC-SVC-031

Advising questions

Before requesting advising help, identify the decision or requirement you need to discuss. Keep the relevant course list or degree requirements available for the advising conversation.

Registration questions

Write down the course, term and error you encountered. A useful request summary identifies the obstacle, such as Registration prerequisite question, rather than containing only Help.

Financial aid questions

Identify the document, application item or notice that raised your question. Do not include bank details, account passwords or complete financial documents in the ticket title.

Create a request

Open New ticket at /tickets/new/. Enter one issue in the Request summary field, using no more than 120 characters, and select Create ticket.

Review the record

The saved ticket number, summary and status appear on the ticket page. Keep the ticket number for reference. A submitted request does not book an appointment or change a registration or financial aid decision.

Follow up

Use Your tickets at /tickets/ to locate your request. Close the ticket when the question no longer needs attention. Keep separate issues in separate tickets so their status can be tracked independently.
