Printing assistance

Reference document / Support knowledge

Printer support: verify your print queue and available balance before resending a print job. Ask the verified help desk for help with a stuck printer.

Avoid duplicate jobs

Check the print queue before submitting the same document again. Cancel only jobs belonging to your account. Ask the help desk to investigate a stalled shared printer.

Describe the problem

Record the printer location, approximate time and error message. A screenshot of an error should not expose the contents of a private document.
